• Calabar, Cross River State, Nigeria

Skills

Frontend:

React Next.js
TypeScript
TailwindCSS

Backend:

Node.js Express
Python
REST APIs

Databases:

MongoDB
PostgreSQL
Redis

Tools & Platforms:

Git GitHub
Docker
Postman

Professional Summary

Full-Stack Developer with experience building scalable web applications using **React**, Next.js, **Node.js**, TypeScript, and **Python**. Strong background in REST APIs, frontend performance, and backend architecture.

Work Experience

Product Developer @ Innobee

2025-01 - 2025-08

- Designed and implemented REST APIs using Flask serving internal and external application users
- Built backend business logic and MongoDB data models supporting core product features
- Reduced API response time by optimizing database queries and request handling
- Led backend engineering efforts and planned scalable API architecture
- Collaborated closely with the founder to refine product requirements and technical scope

Full-Stack Engineer @ Nobzo Ent

2025-09 - Present

- Built frontend modules using **React** and TypeScript with reusable component architecture

- Integrated frontend with **Node.js** backend services and REST APIs

- Implemented authentication, data tables, and admin workflows for internal tools

- Improved frontend performance and accessibility through optimized rendering and responsive design

Projects

React **Admin Management Dashboard**

A web-based admin dashboard built with **React** featuring authentication, data tables, CRUD operations, API integration, and responsive layout for managing application data.

CV Generator Web App

A full-stack web application for generating professional CVs with **React** frontend and **Node.js** backend.

Personal Portfolio Website

Responsive portfolio website with dynamic blog content, SEO optimization, and contact form integration.

Education

Bachelor of Technology in Urban and Regional Planning

UNICROSS (2014-02 - 2020-09)

Certificate, CS50's Introduction to Programming with Python

CS50 (2021-01 - 2021-05)

Certificate, Udacity Full Stack Developer Nanodegree

Udacity (2022-02 - 2022-05)

Achievements

- Led backend API design and architecture for a production web application

- Delivered full-stack features from design to deployment

- Improved application performance and frontend responsiveness
